

### **Loud Speaker Paging/Background Music**

We design and install sound systems for retail, office, and warehouse buildings up to 250,000 square feet. We can install industrial, weatherproof speakers for outdoor use.

A few of the brands we recommend and install includes Valcom, Bose, Bogen, and JBL.

We can program it so that you can play background music or make announcements to the entire building or we can divide it into zones or departments so that you can select only needed zones without interrupting other zones. This can be a very powerful tool for fast and effective communications as well as for setting the atmosphere for any workplace.
