

## **Security/VPN appliances**

### **Sonicwall is our product of choice for internet security and firewalls.**

Founded in 1991, SonicWALL, Inc. is a leading provider of integrated security, productivity and mobility solutions. They design, develop, and manufacture comprehensive internet security solutions for companies of all sizes to protect their networks and to provide secure remote access connectivity.

With a proven track record for delivering superior products, SonicWALL has been hailed by industry publications such as InfoWorld, PC Magazine, Network World, and SC Magazine for easy to use, high quality, and high performance Internet security appliances and services.

SonicWALL is the security provider for Toshiba's Strata CIX pure IP business communications systems, providing its PRO 2040 and TZ 170 VPN firewalls and value-added security services such as Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention.

SonicWALL's family of Internet security appliances provide the first line of defense against Internet security threats. They include an ICSA-certified deep packet inspection firewall, IPSec VPN for remote access, IP address management features and support for SonicWALL value-added security services.

Designed to increase security by reducing complexity, SonicWALL Internet security appliances eliminate the cost and complexity of installing and managing separate devices and software packages for comprehensive security.
